Frequently Asked Questions

Genomics seems scary. Do I really want to know?

Your DNA is not your destiny. In fact, understanding your genomic profile empowers you to make intelligent health and wellness choices that may impact your future quality of life.

Why do I have to order this report through my doctor or clinician?

Requiring IntellxxDNA providers to be licensed medical professionals legally allows us to include much more advanced medical information in our reports.

Does health insurance pay for IntellxxDNA tests or reports?

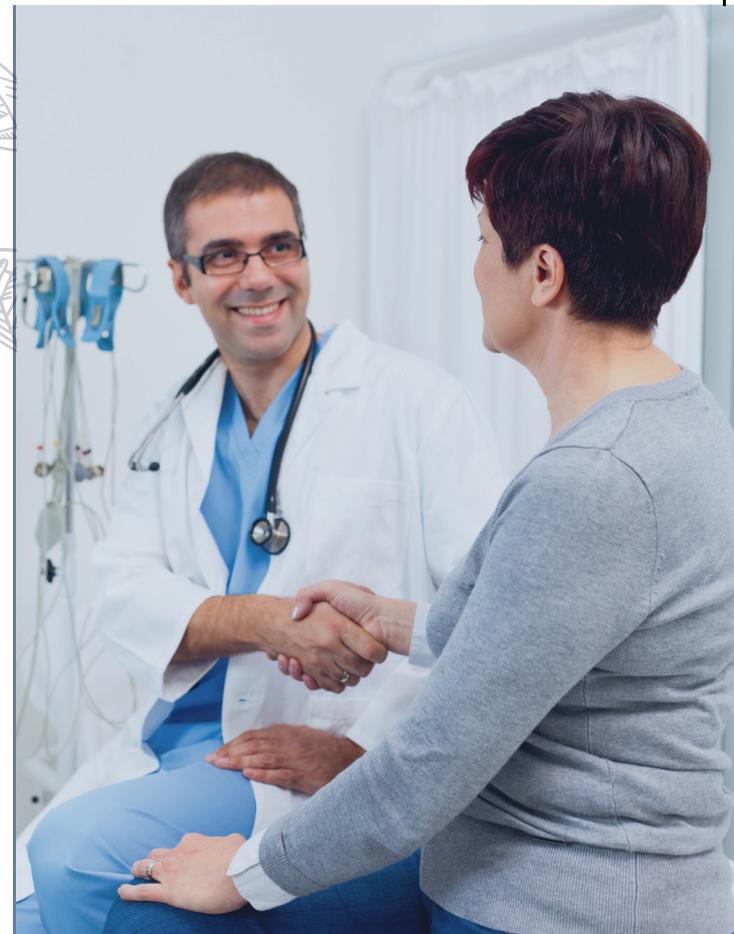

IntellxxDNA reports are not covered by insurance.

What is your privacy policy?

Your DNA will be sent to the lab and identified ONLY by a numeric barcode for outstanding privacy. Your DNA will never be sold. The IntellxxDNA database is encrypted and secure.

Understanding our refund policy:

We have a straightforward refund policy to protect the integrity of test kits, patient privacy and genomic reporting. IntellxxDNA collection kits and genomic reports are non-refundable and cannot be re-sold or transferred to another person.

IntellxxDNA Genomics for Health Optimization

WHAT DO INTELLXXDNA REPORTS SHOW?

Genomics explores the small DNA differences affecting our health and interactions with the environment, including our responses to air pollution, nutrient metabolism, and reactions to substances like alcohol and tobacco. IntellxxDNA reports delve into these genetic details, examining your unique DNA variants or SNPs that may indicate potential health benefits and risks.

These reports aid your clinician in understanding the intricate interaction of these variants and their impact on your life, offering actionable, evidence-based intervention strategies tailored to your genetic makeup for true personalized care. This encompasses suggestions related to environment, lifestyle, nutrition, supplements, and medications, enabling a comprehensive and personalized discussion between you and your clinician.

MAKE INTELLXXDNA GENOMIC REPORTS THE GUIDE TO YOUR HEALTH

- Learn how to **support your body** using personalized nutrition, vitamins and supplements, as well as lifestyle changes to reduce the need for medications.
